Developer, Senior Developer, Team Leader, Mobile Solution Services., Ltd, HCMC, Vietnam.	2006-2007

Responsibilities

Build **Data Connector** to integrate with hundreds of platforms, from Marketing services like Facebook Ads, Google Ads, to Data platforms, such as Tableau and Microsoft PowerBI.

- Develop Embulk plugins in Java and Ruby.

Participate in product design. **Train** newbies and junior engineers.
Troubleshoot issues and collaborate with 3rd party staffs to resolve issues or find solutions to limitations.
Maintain **Data Mart** platform, involving setup PostgreSQL and Redshift by **Ruby and Terraform**, add monitors using Datadog.

Zen Marketing

Build **Data Importers** to collect and aggregate advertising data from multiple Data Sources, using various methods, from **Web scrapers**, **API consumers** to **Email importer**.
Serve big clients as **Zynga** and **Lyft**.

Troubleshoot external services and **collaborate** with their staffs to solve issues.

Harvey Nash Vietnam

Work in 2 outsource projects, one is global-wide service Unified, the other is a relative small project, to build in-house tools.

I had a great chance to explore many tech stacks, from REST API using **Go**, **Jersey/Glassfish**, to frontend frameworks such as **EmberJS/Bootstrap**, and **PrimesFaces (JSF)**.

Simple Solutions Taipan

Develop a **Volunteer Management System** (VMS) for SEAGames (aka. South East Asia Games) 2015 in Singapore. Involve most of components, from public portal, SSO, backend APIs to manage volunteer profiles, broadcast system via multi channels.

Tech stack: **CAS** (Central Authentication Service), **Spring Boot**, **Spring Security**, **Liferay**, etc. Also, manage a small team of 3-5.

Cosatech Co., Ltd

Work for the largest options exchange in U.S, CBOE (Chicago Board Options Exchange).

Build a **Web-based Surveillance (WBS)** using EJB, Struts, Oracle 11 and Jetty.

Implement **exception algorithms** (researched by Data Engineers) to catch fraud trades.

Manage a team of 5, work with onshore PMs, task planning/assignments and documentation.

i-POP Networks Pte Ltd

Develop mobile websites for Southeast Asia market, with global brands as Mobile ESPN, Bloomberg, Cartoon Network, Electronic Arts.

Maintain an automatic **sport feeds importing system**. Create backend services to **process SMS messages**.

Tech stack: **Spring Core/MVC**, **Hibernate ORM**, XML processing, Hessian web service, MySQL, HTML/CSS (particularly for mobile handsets).

ASAO Corp., Ltd

Build **Marketing websites** for online games and mobile value-added services, using ZendFramework, MySQL, HTML/CSS/JS.

Backend services to process SMS messages. Manage a small team of 2.

Mobile Solution Services

Build **Marketing websites** for mobile value-added services, such as bidding games, content download, with ZendFramework, MySQL, HTML/CSS/JS.

Create **Handy Community**, the first community of user-generated contents for mobile in Vietnam. Make use of **ffmpeg** and build a website allowing users to upload and convert multiple media formats in realtime, including audios, videos, and pictures.

Manage a web team of 5.

Yao Lu, Senior Engineer Manager of Arm Treasure Data

Ian Morrison, Engineer Manager, Founder of GKxIM Vietnam

Phan Cong Thanh, CEO & Founder, Head of Atlassian Vietnam, CEO of EgoPulse

Awards and honors	**Consolation Prize, Programming**, National excellent student, VN.	2001
	Bronze medal, Programming, Olympic Contest, Da Nang, VN.	1999

Hobbies

Hackintosh: Don't you love macOS? As a Mac enthusiast, I enjoy making it run on non-Apple PC/laptop.

Reverse Engineer

Interested in reversing web APIs.

Embedded Linux

Passionate in Linux, especially embedded systems. I love exploring all kinds of embedded devices, from SBC (rPi, udoo), NAS to WiFi routers.
Maximize functionalities, adding new features to embedded devices.

Entertainment

A cinephile and an audiophile.
